

Cell Line Designation	MCC26
CellBank Catalogue No.	CBA-1341
Lot Number	13410210S
Total Cell Number	2.1 x 10 ⁶ cells
Expected Cell Viability	95%
Brief Description	Merkel cell carcinoma cell line
Organism	Human (<i>Homo Sapiens</i>)
Strain	
Tissue	Skin
Growth Properties	Adherent
Morphology	Large, low contrast cells

Image

Growth Medium	RPMI 1640 (with 2mM L-Glutamine+25mM HEPES) + 15% FCS
Subcultivation Ratio	Optimal split ratio 1:4 – 1:8 (seeding density 0.8 x10 ⁴ cells/cm ²). Harvest the cells using 0.05% Trypsin/EDTA at 37°C for 5 min.
Biosafety Level	PC-2 This cell line is sent with the condition that you are responsible for its safe storage, handling and use. CellBank Australia is not liable for damages or injuries resulting from receipt and/or use of a CellBank culture.
Use Restrictions	These cells are distributed for research purposes only - refer to the Material Transfer Agreement (MTA).

<p>Safety Precaution</p>	<p>CellBank Australia highly recommends that protective gloves and clothing always be used and a full-face mask always be worn when handling frozen vials. It is important to note that some vials leak when submersed in liquid nitrogen and will slowly fill with liquid nitrogen. Upon thawing, the conversion of the liquid nitrogen back to its gas phase may result in the vessel exploding or blowing off its cap with dangerous force creating flying debris.</p>
<p>Handling Procedure for Frozen Cells</p>	<p>To insure the highest level of viability, thaw the vial and initiate the culture as soon as possible upon receipt. Remove protective cryoflex layer prior to thaw. If upon arrival, continued storage of the frozen culture is necessary, it should be stored in liquid nitrogen vapour phase and not at -80°C. Storage at -80°C will result in loss of viability.</p>
<p>Establishing and Maintaining your Culture Cryoprotectant Medium Additional Information</p>	<p>Cells incubated at 37°C with 5% CO₂. Refer to Technical & Customer Service Information pamphlet. 10% DMSO + 90% FCS</p>
<p>Depositor</p>	<p>Helen Leonard – Queensland Institute of Medical Research, Australia.</p>
